I'd the pleasure to work with Nicola during the past years and he consistently displayed a high level of professionalism and expertise in all aspects of his work. His analytical thinking, attention to detail, and problem-solving abilities were truly impressive. He possess a deep understanding of complex business processes and systems, enabling him to identify areas of improvement and develop effective solutions to optimize operations.
He possess the necessary skills, expertise, and personal qualities to excel in his role and make a significant impact on any organization

David Pérez · 1st

Talent Acquisition Manager EMEA @ Softtek

June 27, 2012. David was Nicola's client

I had the pleasure to contract Nicola to work in one of our clients in Italy. He passed all the technical interviews without problems and the feedback from our client always were positive.

Regarding his softskills, Nicola always was very polite and serious with his job.

I recommend him to other companies for his technical expertise and for his kindness in all moment.

I enjoyed working with Nicola in one of Nicolas first projects in Portal Software. It was an exceptional pleasure to see his professionalism in a complex customer relationship. Our work as a product vendor was to challenge an SI implementation and recommendations. Focus was review of the pricing and rating configuration and implementation. Nicolas focus and fast understanding of underlying problems were key in delivering our project results. His exceptional commitment, deep industry knowledge and deep product understanding made it very pleasurable to work with Nicola.

Amit J Bhattacharyya · 1st

Senior Technical Product Manager | SAFe POPM Certified Product Manager | Product Management | SME - Enterprise Billing & Revenue Management | Agile Product Lifecycle Management

August 29, 2009. Amit J worked with Nicola on the same team

I worked with Nicola in Rome on a project on Portal Infranet (Now Oracle BRM). I found Nicola to be a very approachable, honestly helpful and a very persevering member of the team. A great person to work with who inspires others with his humility. His technical expertise with Oracle Database and BRM makes him a great asset to have in teams focussed on such projects.
